- **Hobbies:** Coding, Editing

Skills

Projects

Student Management System

Built a system to manage student registration, courses, and performance records with easy add/update features, improving data organization and accessibility.

Hospital Management System

Designed and implemented a system to manage patient/doctor registrations, appointment scheduling, and billing, improving hospital record-keeping and efficiency.

Voting System using Blockchain

Developed a secure and transparent electronic voting platform leveraging blockchain technology to ensure data integrity, prevent tampering, and build trust in the voting process.

Experience

Team Leader – Voting System Using Blockchain

- Lead a team to design and implement a secure, transparent electronic voting system using blockchain technology.
 - Managed project lifecycle including task allocation, coordination, and testing to ensure timely and reliable delivery.
-
